SOME POLITICAL UNCERTAINTIES.

A practical politician in Minnesota is quoted as saying that the Republican sentiment of his State is at present decidedly for BLAINE, but that " circumstances," which gation intoline for HARRISON. At the same time Washington despatches assert that the friends of the Administration are not a confident as they were, and that they are the new third party. Visions of Uncle JERRY RUSK as a Presidential quantity are said, meanwhile, to be assuming a more distinct form.

Altogether, now that the swing around the circle has been completed and the platform hurrals have ceased to echo, there seems to have been gathered on the trip nothing but new uncertainties. The intited possibility that President HARRISON night find on his tour how popular Mr. BLAINE is, developed into a real truth. The man from Maine has Republican hearts where the man in the White House has only politic consideration. It is this which eauses the uneasine as at Washington and which lends strength to the apprehensions regarding new issues that will be, new canstee that may be and a new party that is.

WHAT OF THE TUNNEL?

Time has flown very swiftly since the sage of the bill providing for the lighting and ventilation of the Fourth Avenue Hailway Tunnel. If its flight has been marked by any practical step towards the fulfilment of that law's purpose, the progress has not been reported. Yet the matter is one of great public importance and the questions involved are of such a nature that an early application towards their solution is demanded.

Upon the Railroad Commissioners rests the responsibility for carrying out the law. It is such a burden of duty as they should be pleased to discharge with the utmost possible promptness; and it is due to the ested public that the steps to that end uld be taken in the sight of the people.

There is no spectacle which tones up the feelings more than an old age full of vigor and vivacity. Nobody would object to being ninety-four if he could feel and act and look like twenty-one. A beautiful example of long vity and conservation of force is presented in an old woman of eighty years, who was detected in somebody' house helping herself to alien goods. The head of the family, his wife, three daughters and a buxom Irish girl mounted guard over the old pilferer while a small boy scur ried for the police. When the "copper arrived the guard of six were in a dread. fully disabled condition, all rumpled and scratched and torn, while the servant had locked herself up. The lusty old thief had cleaned out the whole party. She was not old defender few can compare with her.

The electric button is being applied all around. A man in Maine, that State where the charm of drinking liquor is enhanced by its being forbidden, has a groggery with an expert in the window who presses an electric button to discriminate between the "shady" and "straight" customers. There is always a pleasure in seeing the field of employment enlarged. A Connecticut man bas a button connection with his chicken-bouse as well as a burglar alorm. If a chicken thief invades the home of the fowl the owner is awakened. He presses the button and the chickens get a tharge which sets them a-crowing. The thief usually does not wait to investigate Electricity is a great and beautiful thing.

There is no reason why a burglar may not have some fine feeling in him, although burgling is not of itself likely to bring out the best in a man. A fellow who was caught breaking into a house has written a letter to his wife full of contrition for having wedded her when he was so unworthy. He prays for her forgiveness and admits her lovely qualities with tearful earnestness. He gave a false name to screen her from the disgrace of his conviction. Perhaps if this burglar of his conviction. Perhaps if this burglar just listen when your mother and I get into an had possessed an income he might have as word.
